B.Schwingenheuer

Web page updated by Peter Grabmayr:

-list of papers:

4 published/accepted in 2007,

Abt et al, *Characterization of the first true coaxial 18-fold segm.*

*n-type prototype detector for the GERDA project*, accepted

Kröniger et al, *Feasibility study of the observation of the neutrino accompanied double beta decay of  $^{76}\text{Ge}$  to the  $0^+$  excited state of  $^{76}\text{Se}$  using segmented germanium detectors*, accepted

Abt et al, *Background reduction in  $0\nu\beta\beta$  decay using segmented detectors using segmented detectors – a Monte Carlo study for the GERDA setup*, NIM A570 (2007) 479.

Pandola et al, *Monte Carlo evaluation of the muon induced background in the GERDA experiment*, NIM A570 (2007) 149.

2 submitted, 1 in preparation

-list of conference proceedings:

only one: Knöpfle, Hanoi 2007.

reminder: do not forget to send your proceeding  
to EB 2 weeks before dead line

- transparencies of talks: at the moment talks from DPG 2007 only

- plots: only a few plots (sensitivity),

& photos,

& detector pictures are available

& only for a few subgroups

should we use the WIKI page for photos/plots ??

main source of plots for talks are from slides (?)

question: should we change this?

comments & wishes from the collaboration are welcome
