

....a few final remarks

... many, many highlights....

Phase II: Segmented vs. BEGe-type discussion

- excitement.....
- work out whether we have two options (IKZ success & quote for p-type required)
- allocate funds
- evaluate pros and cons based on results

- Meeting format: ‘problem with Wednesday morning’
- Two days too short – three day meeting?
- Discussion on format at pmg phone calls – please provide feedback!

GERDA

Progress report to the LNGS scientific committee

(Short write-up)

LNGS-EXP 33/08 add. 7/08

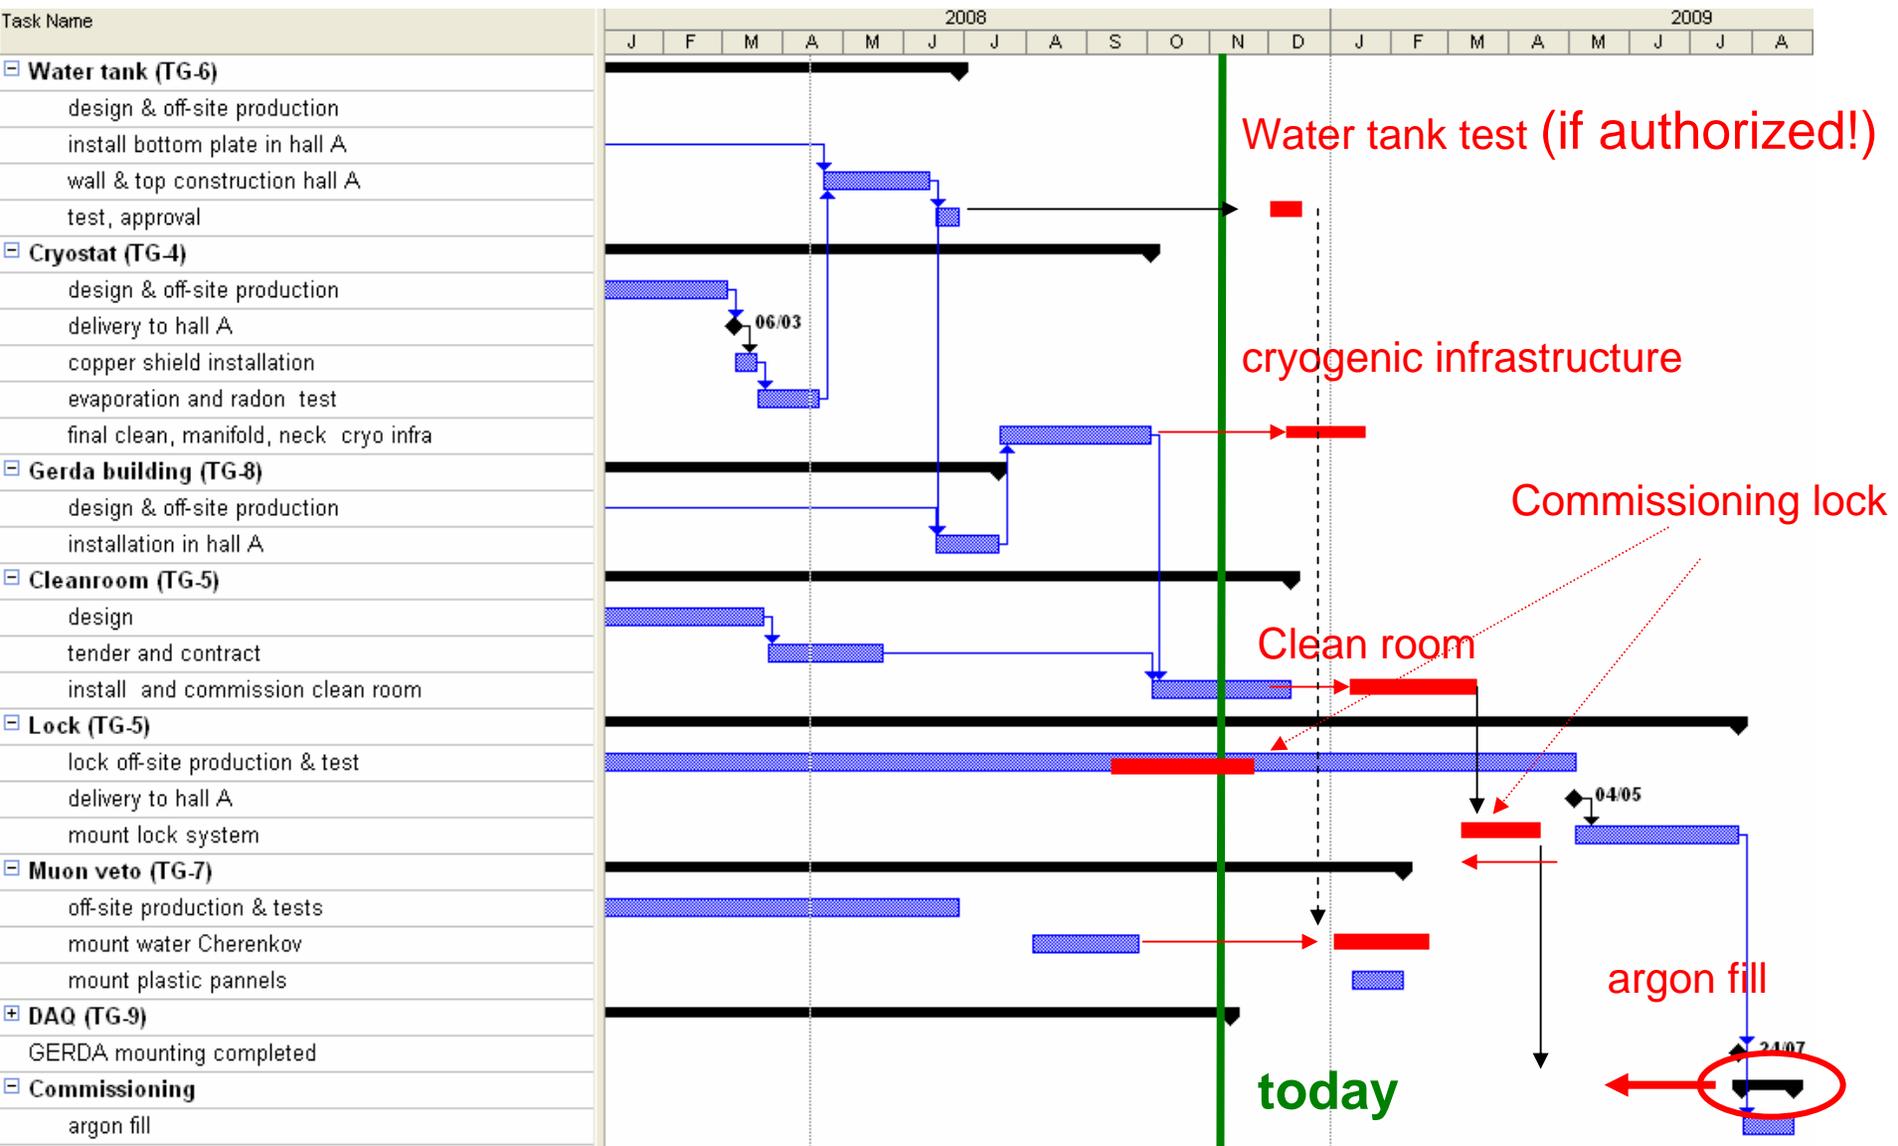

The format of this GERDA progress report differs from our earlier ones to facilitate both fast and in-depth reading. A *short write-up* (<http://www.mpi-hd.mpg.de/GERDA/reportsLNGS/garda-lngs-sc-oct08-shwup.pdf>) summarizes the achievements during the last six months and highlights important issues. An *appendix* to the report (<http://www.mpi-hd.mpg.de/GERDA/reportsLNGS/garda-lngs-sc-oct08-appdx.pdf>) provides additional technical and experimental details for follow-up reading.

October 2008

Short write-up & appendix

LNGS SC meeting: Ready for LAr fill spring '09 !

We want to reach the summit ...

We are here

Many thanks to the LNGS group for hosting us again !!
See you all again in Padova!
