

# Some additional dates:

- LNGS SC meeting:
  - April 21/22 @ LNGS
  - Submission: April 6
  - TG contributions to me by March 30

The background of the image is a complex, metallic structure, likely the interior of the International Space Station, featuring a grid of panels and various mechanical components. A large, central rectangular area is filled with a dark blue background speckled with white dots, resembling a starry sky. Several circular, glowing elements are scattered across this blue area. Overlaid on this scene is white text.

Many thanks to the Padova  
group !!!!!

See you all again latest at
