

Some final remarks ...

- E.g.: excellent progress since last meeting in Milano
- Some issues (but not a complete list):
 - Completion of safety review prior to next LNGS SC review: LNGS safety report
 - Construction and integration of main infrastructures in hall A: keep goal commissioning of GERDA in 2008
 - Long-term test of prototype detectors
 - Integration of Phase I detector/FE/DAQ
 - Phase II crystal growing

Upcoming dates

- Next LNGS SC meeting: April 18/19
 - Report due: April 4
 - Contributions from TG leaders: March 28
 - LNGS-SC: “produce an up-dated project plan (including resources, timetable and milestones)”

Question of taste?
